

Path forward for naming the uncultivated

VIRTUAL WORKSHOPS

Workshop 1: Feb 4 (15:00 GMT) and Feb 5 (00:00 GMT):
Practical barriers to naming uncultivated microorganisms

Workshop 2: Feb 11 (15:00 GMT) and Feb 12 (00:00 GMT):
Path forward to implementation and adoption of the Uncultivated Code

Two sessions each day to accommodate different time zones
(2.5 hrs duration)

The purpose of these workshops is to bring together the international community of microbial scientists to create awareness of progress being made towards developing a solution for naming uncultivated Archaea and Bacteria. A new, alternative code for naming uncultivated organisms, the “Uncultivated Code”, is currently in development. These virtual workshops will provide background, roundtable panel discussions, and a forum for community input.

Seeking participation across the international community of microbiologists including subdisciplines such as systematics, biomedical microbiology, microbial ecology, bioinformatics, taxonomy, microbial systems science, microbial genomics, etc. Early career scientists are encouraged to attend.

Registration is open (and free):
<https://apply.hub.ki/uncode2021/>

Please register soon to facilitate workshop planning.
